

## JAVA PROJECTS

S. NO	TITLE NAME	TECHNOLOGY
1	A key policy attribute-based temporary keyword search scheme for secure scheme cloud storage	Java
2	Cashless society managing privacy and security in the technological age	Java
3	A novel feature ranked search over encrypted cloud data	Java
4	A novel feature ranked search over encrypted cloud data	Java
5	Identity-based encryption transformation for flexible sharing of encrypted data in public cloud	Java
6	Characterizing the progation of situational information in social media during covid-19 epidemic	Java
7	A new lightweight symmetric searchable encryption scheme for string identification	Java
8	Authentication and key agreement based on anonymous identity for peer to peer cloud	Java
9	Designing secure and efficient biometric based secure access mechanism for cloud server short cut	Java
10	Benchmarking image retrieval diversification techniques for social media	Java
11	User behaviour prediction of social hotspots based on ,ULTI message interaction and neural networks	Java
12	Block chain based data storage with privacy and authentication in internet of things	Java
13	A trustworthy privacy preserving framework for machine learning in industrial IOT systems	Java
14	Crisis-critical intellectual property findings from the covid-19 pandemic	Java
15	Trust-based video management frame work for social multimedia networks	Java
16	Privacy protection and instruction avoidance for cloudlet-based medical data sharing	Java
17	ADSHERLOCK efficient and deployable click fraud detection for mobile applications	Java
18	TAFC: time and attribute factors combined access control for time sensitive data in public cloud	Java
19	Personalized recommendation system based on collaborative filtering for IOT scenarios	Java
20	Activity minimization of misinformation influence in online social networks	Java
21	Modeling behavioral dynamics for asymmetric application layer DDOS detection	Java

22	Achieving secure and efficient dynamic searchable symmetric encryption over medical data	Java
23	Multi-party high-dimensional data publishing under differential privacy	Java
24	Active online learning for social media analysis to support crisis management	Java
25	Tweet retrieval based infrastructuire damage assessment during disasters	Java
26	Detection of malicious social boots using learning automata with URL features in tweeter network	Java
27	Time and attribute factors combined access control on time-sensitive data in public cloud	Java
28	Efficient traceable authorization search system for secure cloud storage.	Java
29	Online pricing reserve price constraint for personal data markets	Java
30	Suicidal ideation detection a review of machine learning methods and applications	Java
31	Location aware service recommendations with privacy preservation in the internet of things	Java
32	A sentiment polarity categorization technique for online product reviews	Java
33	Emotion correlation mining through deep learning models on natural language text	Java
34	A secure and efficient cloud centric internet of medical things enabled smart health care system with public verifiability	Java
35	Dgdfs dependence guided discriminative feature selection for predicting adverse drug-drug interaction	Java
36	Understanding the user behavior of foursquare a data driven study on a global scale	Java
37	Secure cloud storage with data dynamics using secure network coding techniques	Java
38	Privacy-aware personal data storage PPDS learning	Java
39	Secure data sharing in cloud computing using revocable-storage identity-based encryption	Java
40	Customer-satisfaction-aware optimal multi server configuration for profit	Java
41	Identity-based data outsourcing with comprehensive auditing in clouds Provably secure key-aggregate cryptosystems with broadcast aggregate keys for online data sharing on the cloud	Java
42	Provably secure key-aggregate cryptosystems with broadcast aggregate keys for online data sharing on the cloud	Java

43	CODETECT financial fraud detection with anomaly feature detection	Java
45	HealthDep: An Efficient and Secure Deduplication Scheme for Cloud-Assisted eHealth Systems	Java
46	Class cloud log assuring soundness and secrecy scheme	Java
47	A three-layer privacy preserving cloud storage scheme based on computational intelligence in fog computing	Java
48	A network coding and des based dynamic encryption scheme for moving target defense	Java
49	An efficient and privacy-preserving biometric identification scheme in cloud computing	Java
50	Data leakage detection	Java
51	SOCIALQ&A: an online social network based question and answer system	Java
52	Searching trajectories by regions of interest	Java
53	Network capability in localizing node failures via end-to-end path measurements	Java
54	SOCIRANK: identifying and ranking prevalent news topics using social media factors	Java
55	Query expansion with enriched user profiles for personalized search utilizing folksonomy data	Java
56	L-injection: toward effective collaborative filtering using uninteresting items	Java
57	Energy-efficient query processing in web search engines	Java
58	Securing cloud data under key exposure	Java
59	Privacy protection and intrusion avoidance for cloudlet-based medical data sharing	Java
60	A lightweight secure data sharing scheme for mobile cloud computing	Java
61	Traffic and Energy Aware Routing for Heterogeneous Wireless Sensor Networks	Java
